20011 - Wipers On. Lights On!®

Headlights come on automatically when you turn on your wipers

Summary:

Never again forget to turn on the lights in bad weather or forget to switch them off when you park your car

Increase safety for you and your vehicle by making your vehicle more visible to oncoming traffic.

The 'Light Your Way' option leaves your headlights on for 25 seconds after the ignition

is turned off - to light your way as you walk away from your vehicle.

Installation:

The Wipers On. Lights On! system is a simple, under the hood, seven-wire installation: 12-volts constant, Ground, Ignition sense (any wire that supplies 12 volts only when the vehicle is running), High beams, Low beams, Parking lights and the Windshield wiper motor.

2 Year Limited Warranty

Made in USA

Product Code: 20011

Price: \$ 39.95

CCS SystemDrive

20012 - Lights On!®

Automatically turns on your vehicle's headlights when it gets dark or when visibility is reduced

Summary:

You may never have to touch your light switch again!

No more dead batteries from headlights left on since the headlights are automatically turned off with the vehicle's ignition.

'Light Your Way' option leaves headlights on for 20 or 40 seconds after the ignition is

switched off to light your way to the door.

Installation:

The Lights On! system is a simple, under the hood, seven-wire installation: 12-volts constant, Ground, Ignition sense (any wire that supplies 12 volts only when the vehicle is running), High beams, Low beams, Parking lights and the Windshield wiper motor. The daylight sensor is mounted to the front grill of the vehicle.

How It Works:

The Lights On! photocell automatically monitors ambient light. When darkness falls, the sensor switches the headlights and parking lights on making the vehicle more visible to oncoming traffic. The lights remain on until the sensor registers enough light to switch the headlights off (or until you switch the vehicle's ignition off).
